Portfolio: Teja

CAREER OBJECTIVE

Aspiring Full Stack Developer with a strong foundation in Python, Django, React.js, and SQL, seeking an entry-level opportunity to contribute to scalable web application development while continuously learning in a collaborative environment.

EDUCATION

Bachelor of Technology in Computer Science and Engineering
Sai Ganapathi Engineering College
Board of Intermediate Education
Vagdevi KVR's Junior College

January 2020 – May 2024
CGPA: 7.15
April 2018 – May 2020
Percentage: 70.15%

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript
- **Web Development:** HTML5, CSS3, React.js, Bootstrap, AJAX, JSON
- **Frameworks:** Django
- **Databases:** SQLite, PostgreSQL
- **Version Control & Tools:** Git, GitHub, VS Code
- **APIs:** REST APIs

INTERNSHIPS

Demy Software Solutions – February 2024 – July 2024

Machine Learning Intern

- Engineered and optimized Python-based machine learning models using scikit-learn, pandas, and NumPy to streamline data processing and build scalable predictive solutions.
- Conducted comprehensive system analysis and debugging, reducing runtime errors by 20% through rigorous code reviews and testing methodologies.
- Collaborated to maintain and enhance software programs, resulting improvement in system efficiency and response time.
- Automated data preprocessing pipelines, accelerating data handling processes by 30% and ensuring robust data quality for model training and validation.

PROJECTS

Mart E-Commerce Website – March 2025 – April 2025

- Engineered a React-based e-commerce platform featuring cart functionality and interactive product filters to enhance user interaction efficiency.
- Implemented React Router and optimized state management, reducing page load times by 25% and improving navigation fluidity.
- Developed reusable components following component-based architecture, increasing code maintainability and reducing redundancy by 40%.
- Designed and integrated responsive UI layouts, achieving cross-device compatibility and improving user engagement metrics.

Meal Finder App – January 2025 – February 2025

- Established a meal search application using Vanilla JavaScript, integrating TheMealDB API to enable real-time data retrieval and filtering.
- Implemented async/await patterns to optimize API request handling, reducing response latency by 30% and enhancing data flow efficiency.
- Constructed interactive DOM manipulation to render search results, increasing UI update speed through precise element targeting and minimal reflows.
- Executed robust API error handling mechanisms, improving application stability by 40% and minimizing failure rates during data fetch operations.

CERTIFICATIONS

- Attained Certification in Python Full Stack Development – AchieversIT Institute.
- Completed Machine Learning with Python Internship Certification.
- Achieved Python Full Stack Internship Certification.
